

PEER FEEDBACK - UNIT 1

What's working

- Using found objects to create a set of patterns
- The designs are visually compelling and engaging and show an eye for colour and balance.
- An interesting approach to describe a place through a collection of objects
- An approach that offers many solutions can be continued.

What is not working

- The outcome needs a broader context so it can be distributed to people / engaged with the place.
- Digitalising the textures flatten their appearance.

To develop this further...

- Find a way to distribute the designs to the outer World.
- Try to work with various printing methods to work with the patterns in a physical form.
