

PEER FEEDBACK

Unit 1.2 - Methods of Cataloguing

What is working well?

- The process demonstrated how different mediums bring nuances to the presentation and the way of circulation of your work.
- The AR allows a viewer to experience and engage with the collection.
- Getting a sense of a virtual garden
- Innovated and cool way of cataloguing
- Using a range of approaches
- Proposes a new way of collecting digital data

What's not working

- One student thinks that the paper version of the project worked better.
- I could try to explore different methods than sorting the plants into colour groups.

To develop this further...

- Incorporate text elements into the collection
- Try to experiment with different ways of experiencing the same flowers
- Try to apply the same approach to a new set of content
